■ **International Eco Light Group has 16 years of successful experience in the lighting industry.**

The basic directions of the activity of International Eco Light Group are :

■ **Manufacturing**

Besides of using advancing technologies and modern lighting design, we also pay a big attention to service and quality. The entire lighting production compulsorily passes the procedure of thorough control of the correspondence to international quality standards (in particular - to international standards CE and UL).

Thanks to our computerized Bill of Material management system we are able to adjust out assembly line to be more fluid and flexible in order to cope with variety of lighting fixture orders.

■ **Quality Control**

We provide for total quality control: from the regulation of the quality of raw materials, assemblies, products and components as well as management, production and the inspection process right up until the products leave the factory.

■ **Delivery**

Our logistic department can deliver combined cargoes and containers with lighting products according customer's specifications to any point of the world.

■ **We are delighted to present to your attention a new catalogue of our products.**

We offer you lighting equipment for illumination of public premises, home and office interiors. In this catalogue you will find technical features of lighting devices. There is also information about the colours and types of bulbs, used in this equipment.
